

How to Connect your personal (NOT DISTRICT PURCHASED) iPhone or iPad to Hopkins Wireless network.

As a courtesy we are providing this information for your personal device since we do not support configuration on personal device. Please do NOT turn in a work order for your personal devices.

When you return you will discover that the MDMWireless, Hopkins and the Admin networks are gone. We have removed those options. You will only see Hopkins Wireless. Not all phones have proceeded in this order. Please review the directions before starting.

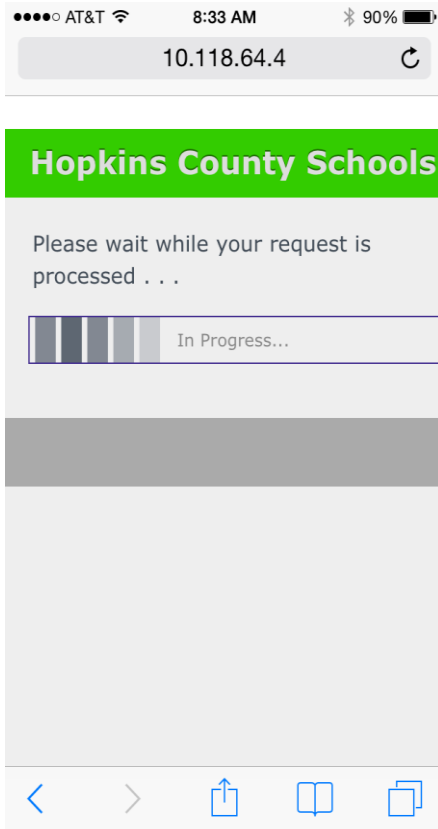

1. Make sure that all Apps and Safari have been killed before starting.
2. Turn your Wi-Fi on and select *Hopkins Wireless*. Once that has a check mark in front of it go to Safari.
3. Once in Safari, go to any website. You will then see this screen appear.

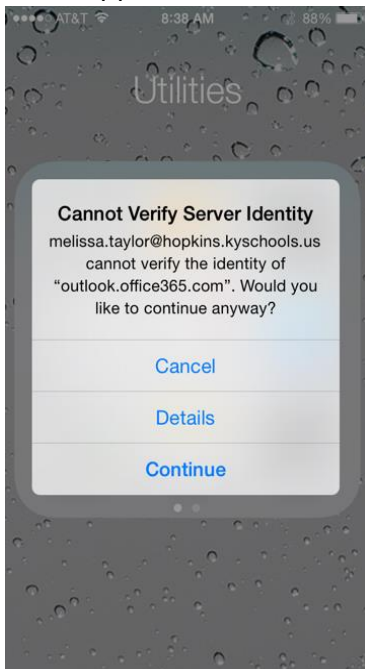

Click where it says Please click here to connect to the network.

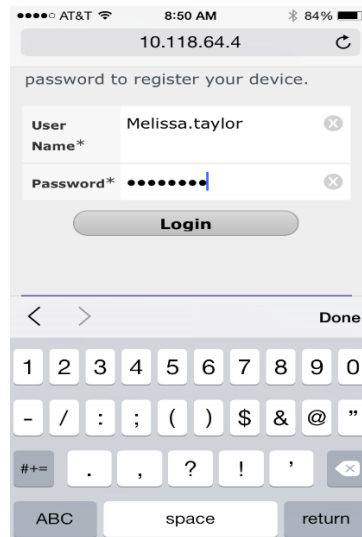

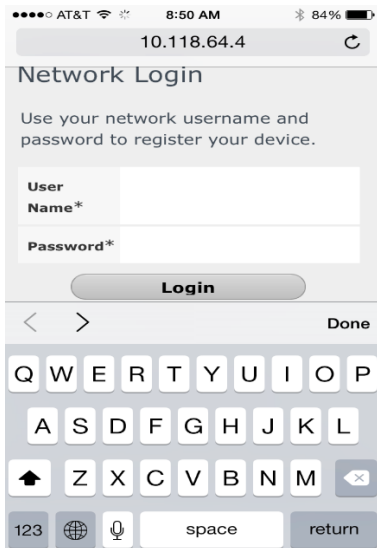

4. A screen like this will appear, this part may take 30 seconds or more.

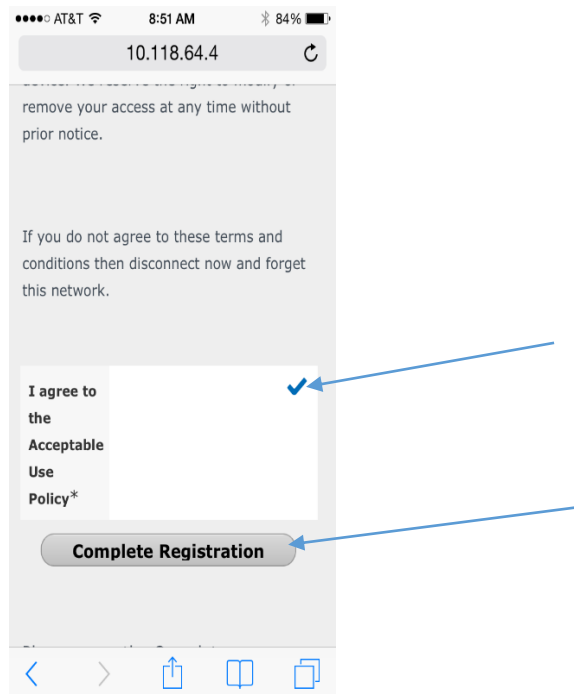

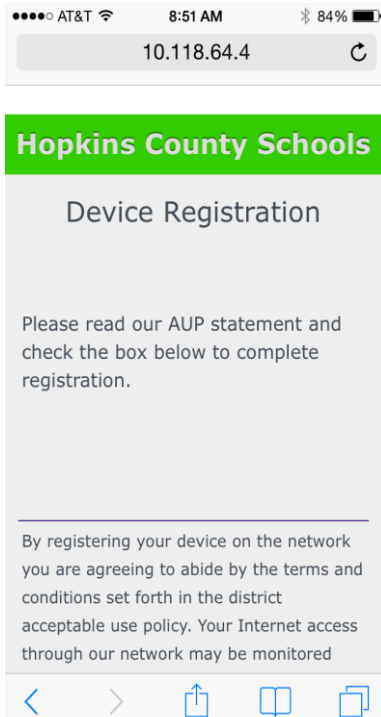

5. If this appears, select Continue

6. Place your username and password in these fields. **IT IS NOT YOUR EMAIL ADDRESS! IT IS WHAT YOU USE TO SIGN IN TO YOUR COMPUTER EVERYDAY WHICH IS NOT YOUR EMAIL ADDRESS! Firstname.lastname.**

7. This screen will then appear, scroll down to the bottom and touch the check box. The check mark will be grayed out until you touch it. Then select Complete Registration

8. Once your registration is complete, you will see this final screen. You are now connected to the Wireless.
